DEPOSUN GLASS TOP 760 MULTIEXIT

S **SOCODREN** S.A.
Drenaje · Construcción · Urbanismo

CLIENT: FLD SMITH

LOCATION: Antofagasta, Chile

DATE: 2013-2014

Our client, is an architecture office. They decided to use DEPOSUN GLASS TOP 760 MULTIEXIT after the visit of the SOCODREN commercials. Socodren are distributors of DEPOSUN GLASSTOP in Chile.

The system finally used is GLASS TOP 760 MULTIEXIT. With this system we light several offices one on top of the other. The main issue was to find the place for those pipes to pass along the different flats of the building.

With GLASS TOP MULTIEXIT we can solve the problem, that we have sometimes, when we want to light several offices one on top of the other, by using a single sun pipe DEPOSUN.

For this project, located in a desert area; it was very important to take profit of the good lighting of the area, but without increasing the heat inside the building. With DEPOSUN GLASS TOP you have day light but not heat.

The characteristics of this product are:

- Better Luminous Performance (selective luminous transmission, homogenous light distribution, glare control)
- Better thermal Performance (selective solar factor, better thermal transmission coefficient, thermal bridge break)
- Less Maintenance (less aging, less scratching, less chemical agents attack)
- Better fire behaviour.

For information (+34) 934 090 359 or visit www.espaciosolar.com and discover the possibilities of sun pipes, solar reflectors, optic fiber systems, or our high performance skylights. We work to make your projects shine.
