

NEW LICOR 43 FACTORY (5.000 m²) LIGHTING BY 85 units of DEPOSUN GLASS TOP 550

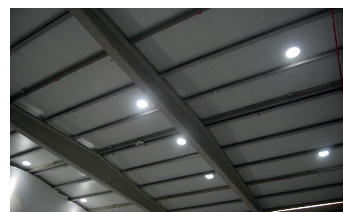

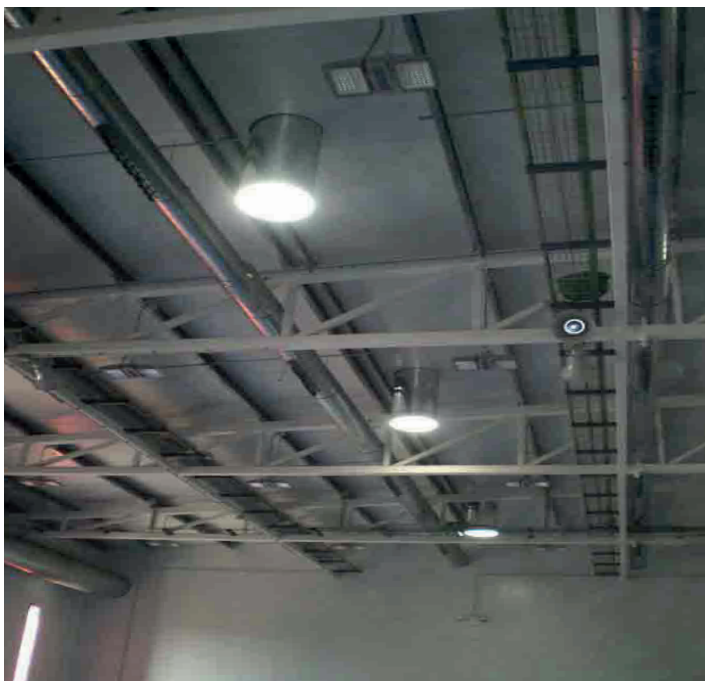

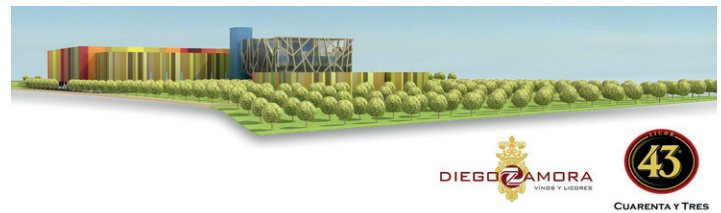

CLIENT:	Grupo Diego Zamora
DATE:	2012
REF:	Licor 43

Diego Zamora group have built new premises at La Union (Murcia, Spain), because of business expansion. In collaboration with Espacio solar Engineering they have studied the use of sun pipes in order to achieve more efficient and sustainable installations in different areas of the factory such as: production area ,bottle area, finished material area, and soon.

Finally 85 units with different lengths depending on the area, were installed in order to achieve the light performance required by the owners.

As a result we have several automated areas in the factory that are lighted by a free, efficient and sustainable system.

Our sun pipes give an ideal solution for this kind of industrial buildings, with investment return accurate and interesting.

For information (+34) 934090359 or visit www.espaciosolar.com and discover the possibilities of sun pipes, solar reflectors, optic fiber systems, or our high performance skylights. We work to make **your projects shine**.
