

INSTALATION OF SUNPIPES DEPOSUN GLASS-TOP 760 TO ILLUMINATE A NEW BUILDING

CLIENT:	CARTOLOT
LOCATION:	OLOT
ENGINEERING CO:	GECSA
DATE:	JULIO 2014

The company Cartolot of the Cartonajes M. Petit S.A group, decided to build new premises at Olot (Girona). Natural light is one of the most important subject in the design of the new building.

Finally they decided to use the DEPOSUN GLASS TOP 760 system in the factory and the warehouse areas instead of traditional methacrylate skylights.

Our system offers the following advantages:

- Better Luminous Performance (selective luminous transmission, homogenous light distribution, glare control)
- Better thermal Performance (selective solar factor, better thermal transmission coefficient, thermal bridge break)
- Less Maintenance (less ageing, less scratching, less chemical agents attack.)
- Better fire behaviour.

In the end more than 80 Deposun glass-top 760 have been installed. They will provide the appropriate day lighting throughout the year , and will allow to work in a healthy way along many hours per day without using artificial light. This will also lead to energy savings in those areas.

For information (+34) 934 090 359 or visit www.espaciosolar.com and discover the possibilities of sun pipes, solar reflectors, optic fiber systems, or our high performance skylights. We work to make your projects shine.
