

## INSTALLATION OF 28 DEPOSUN PEDESTRIAN FLAT TOP IN ROVIRA I VIRGILI UNIVERSITY

LOCATION: TARRAGONA

ARCHITECT: Bardaji &amp; Teixidor assoc.

CLIENT: ROVIRA I VIRGILI

REF: ROVIRA I VIRGILI

Rovira i Virgili university has recently enlarged its installations located in the Catalunya avenue in Tarragona.

Several new spaces and services have been built in order to respond to the new student's needs.

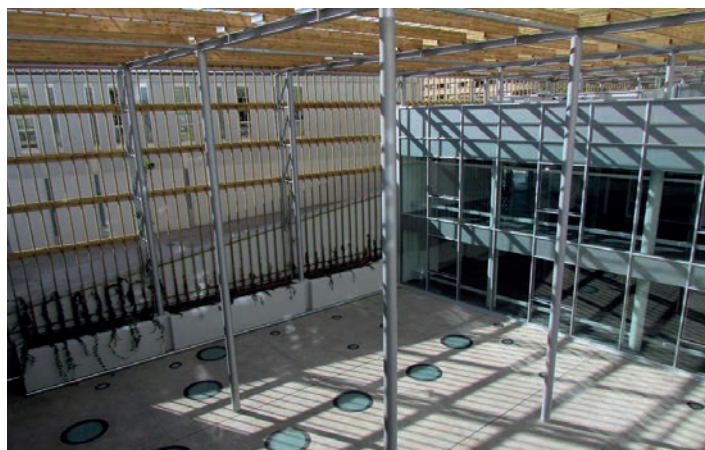

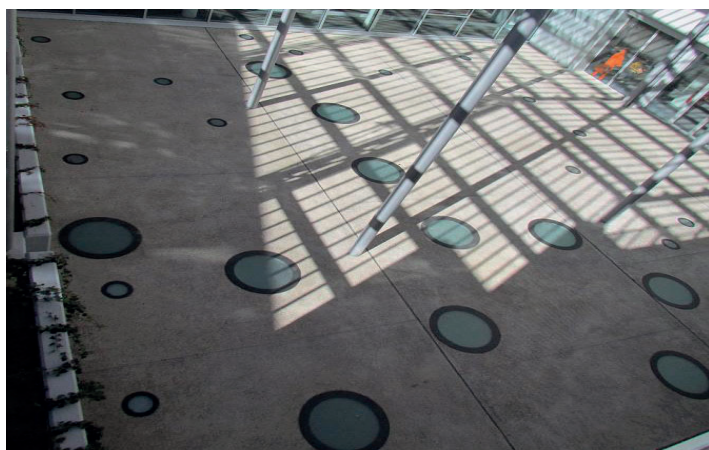

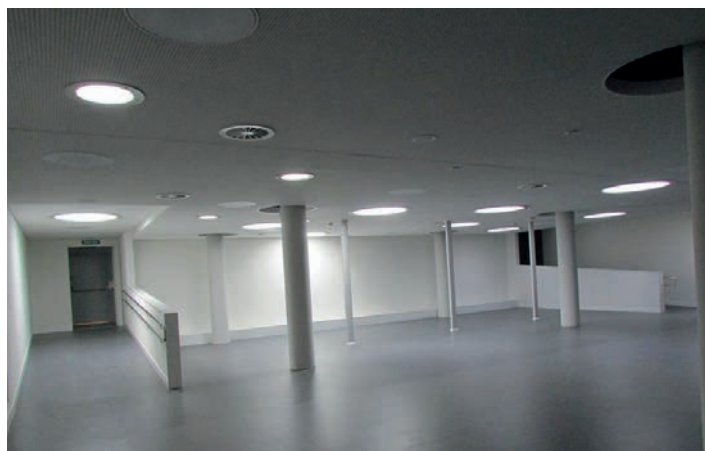

Espacio Solar together with the architects Bardaji & Teixidor Associats studied the best way to give this new space, that was located under street level, a good quality of natural light.

With **DEPOSUN FLAT TOP**, we obtain an optimal natural light level in the inside area and the roof can be totally walked through.

### DEPOSUN FLAT TOP gives:

- Sun pipe integrated to the floor, it doesn't disturb.
- Sun pipe made with triple safety laminated glazing, which is very convenient against breaking.
- It has a non slip certification.
- It is designed to support overweight produced by pedestrian.

For information (+34) 934 090 359 or visit [www.espaciosolar.com](http://www.espaciosolar.com) and discover the possibilities of sun pipes, solar reflectors, optic fiber systems, or our high performance skylights. We work to make **your projects shine**.
